

# OriGene's Comprehensive Solutions for Your Assay Needs

OriGene brings its powerful reagent systems to create a new single and multiplexed immunoassays, antibody pairs, ELISA reagents and custom developed assays.

## Platforms

ELISA  
Luminex  
MSD-ECL  
Flow Cytometry

## Current Products

ELISA Antibody Pairs  
Luminex Antibody Pairs  
ELISA Kits  
Luminex Kits  
Autoantibody Profiling Arrays

## Luminex Growth Factor Panel

11-plex designed to measure PDGF-AB, PDGF-BB, FGF4, FIGF, FGF2, EGF, HGF, FLT3LG, ANGPT2, PGF, VEGFA in cell culture supernatant, human sera or plasma.

**Cat No. AM100096 (96 rxns)**

## Autoantibody Profiling Arrays

An array of purified full-length proteins conjugated on Luminex beads ready for autoantibody detection in sera or plasma. Autoimmune panels, cancer panels and custom panels available.

**Universal Detection Kit Cat No. AP100001**

**Autoantibody Panels Cat No. AP100002 - AP100024**

# OriGene's ELISA & Luminex Antibody Pairs

Selected and developed from OriGene's extensive TrueMAB antibody collection, OriGene's ELISA & Luminex antibodies undergo a multi-step validation process that optimizes antibody performance to generate the best results for your ELISA or Luminex application.
