Pdcd1 Hamster Monoclonal Antibody [Clone ID: J43]

Product data:

Product Type: Primary Antibodies

Clone Name: J43
Applications: FC

Recommended Dilution: Flow Cytometry.

Reactivity: Mouse
Host: Hamster
Isotype: IgG

Clonality: Monoclonal

Immunogen: PD-1 cDNA transfectant.

Donor: mouse ascites fluid.

Fusion Partner: Mouse myeloma P3U1.

Specificity: This Monoclonal Antibody reacts with Mouse PD-1 (Programmed Death-1).

Formulation: PBS containing 0.02% Sodium Azide as preservative

State: Purified

State: Liquid purified IgG fraction

Concentration: lot specific

Purification: Protein G Chromatography

Conjugation: Unconjugated

Storage: Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Gene Name: programmed cell death 1

Database Link: Entrez Gene 18566 Mouse

Q02242

Background:

CD279 is 50-55kD membrane protein which is a member of the CD28 family, and functions mainly as a negative regulator of T-cell activation. CD279 has two specific ligands; CD274 (PD-L1) and CD273 (PD-L2), and their interaction is key in the balance between stimulatory and inhibitory signals needed for effective immune responses to microbes and self-tolerance. CD279 is inducibly expressed by T-cells, B-cells, NK-T-cells and monocytes upon activation. Loss of CD279 function has been associated with a number of autoimmune diseases, including rheumatoid arthritis, type I diabetes and ankylosing spondylitis. Recent studies suggest that CD279 could be targeted therapeutically in the treatment of HIV infection to reduce T-cell exhaustion.

Synonyms: Protein PD-1, hPD-1, PDCD1

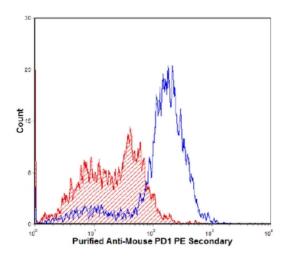

Note: TEST RESULTS (Figure 1.)

Tissue Distribution by Flow Cytometry Analysis:

Mouse Strain: Balb/c

Antibody Concentration Used: 2.0 µg/10e6 cells. Isotypic Control (shaded): Purified Hamster IgG.

Product images:

Cell Source: Con A/IL2 activated T-Blasts from Balb/c spleen. Percentage of cells stained above control: 36.6%
