

## Product datasheet for **AR09829PU-N**

### NME3 (22-169, His-tag) Human Protein

#### Product data:

|                                       |  |
|---------------------------------------|--|
| Product Type:                         | Recombinant Proteins   |
| Description:                          | NME3 (22-169, His-tag) human recombinant protein, 0.1 mg   |
| Species:                              | Human  |
| Expression Host:                      | E. coli  |
| Expression cDNA Clone or AA Sequence: | <u>MGSSHHHHHH SSGLVPRGSH</u> MERTFLAVKP DGVQRRLVGE IVRRFERKGF KLVALKLQQA SEELLREHYA ELRERPFYGR LVKYMASGPV VAMVWQGLDV VRTSRALIGA TNPADAPPGT IRGDFCIEVG KNLIHGSDSV ESARREIALW FRADELLCWE DSAGHWLYE |
| Tag:                                  | His-tag  |
| Predicted MW:                         | 19.1 kDa   |
| Concentration:                        | lot specific   |
| Purity:                               | >95%   |
| Buffer:                               | Presentation State: Purified<br>State: Liquid purified protein<br>Buffer System: 20 mM Tris-HCl buffer (pH 8.0) containing 50% glycerol, 0.1M NaCl, 2 mM DTT                                     |
| Preparation:                          | Liquid purified protein  |
| Protein Description:                  | Recombinant human NME3 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography.   |
| Storage:                              | Store undiluted at 2-8°C for up to two weeks or (in aliquots) at -20°C or -70°C for longer. Avoid repeated freezing and thawing.   |
| Stability:                            | Shelf life: one year from despatch.  |
| RefSeq:                               | <u>NP_002504</u>   |
| Locus ID:                             | 4832   |
| UniProt ID:                           | <u>Q13232</u>  |
| Cytogenetics:                         | 16p13.3  |
| Synonyms:                             | c371H6.2; DR-nm23; NDPK-C; NDPKC; NM23-H3; NM23H3  |

[View online »](#)

**Summary:** Major role in the synthesis of nucleoside triphosphates other than ATP. The ATP gamma phosphate is transferred to the NDP beta phosphate via a ping-pong mechanism, using a phosphorylated active-site intermediate. Probably has a role in normal hematopoiesis by inhibition of granulocyte differentiation and induction of apoptosis.[UniProtKB/Swiss-Prot Function]

**Protein Families:** Druggable Genome

**Protein Pathways:** Metabolic pathways, Purine metabolism, Pyrimidine metabolism
