Product datasheet for CF800109

Proteasome subunit alpha type 6 (PSMA6) Mouse Monoclonal Antibody [Clone ID: OTI5G10]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI5G10
Applications:	IHC, WB
Recommended Dilution:	WB 1:2000, IHC 1:150
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human PSMA6 (NP_002782) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	27.2 kDa
Gene Name:	proteasome 20S subunit alpha 6
Database Link:	<u>NP_002782</u> <u>Entrez Gene 26443 MouseEntrez Gene 29673 RatEntrez Gene 5687 Human</u> <u>P60900</u>

	Proteasome subunit alpha type 6 (PSMA6) Mouse Monoclonal Antibody [Clone ID: OTI5G10] – CF800109
Background:	The proteasome is a multicatalytic proteinase complex with a highly ordered ring-shaped 20S core structure. The core structure is composed of 4 rings of 28 non-identical subunits; 2 rings are composed of 7 alpha subunits and 2 rings are composed of 7 beta subunits. Proteasomes are distributed throughout eukaryotic cells at a high concentration and cleave peptides in an ATP/ubiquitin-dependent process in a non-lysosomal pathway. An essential function of a modified proteasome, the immunoproteasome, is the processing of class I MHC peptides. This gene encodes a member of the peptidase T1A family, that is a 20S core alpha subunit. A pseudogene has been identified on the Y chromosome. [provided by RefSeq]
Synonyms:	IOTA; p27K; PROS27
Protein Families:	Druggable Genome, Protease, Stem cell - Pluripotency
Protein Pathway	s: Proteasome

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY PSMA6 ([RC209976], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PSMA6. Positive lysates [LY419119] (100ug) and [LC419119] (20ug) can be purchased separately from OriGene.

Immunohistochemical staining of paraffinembedded Adenocarcinoma of Human endometrium tissue using anti-PSMA6 mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA800109])
