

Product datasheet for CF801686

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

CD30 (TNFRSF8) Mouse Monoclonal Antibody [Clone ID: OTI9H7]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI9H7

Applications: FC, IHC, WB

Recommended Dilution: WB 1:2000, IHC 1:150, FLOW 1:100

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

Immunogen: Human recombinant protein fragment corresponding to amino acids 19-379 of human

TNFRSF8 (NP 001234) produced in E.coli.

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

Reconstitution Method: For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 61.9 kDa

Gene Name: TNF receptor superfamily member 8

Database Link: NP 001234

Entrez Gene 943 Human

P28908

Background:

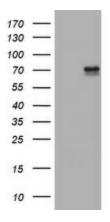

The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor is expressed by activated, but not by resting, T and B cells. TRAF2 and TRAF5 can interact with this receptor, and mediate the signal transduction that leads to the activation of NF-kappaB. This receptor is a positive regulator of apoptosis, and also has been shown to limit the proliferative potential of autoreactive CD8 effector T cells and protect the body against autoimmunity. Two alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported. [provided by RefSeq, Jul 2008]

Synonyms: CD30; D1S166E; Ki-1

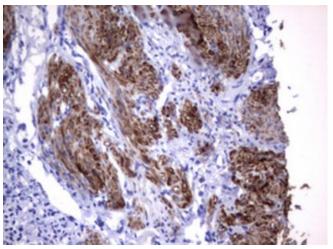

Protein Families: Druggable Genome, ES Cell Differentiation/IPS, Stem cell - Pluripotency, Transmembrane

Protein Pathways: Cytokine-cytokine receptor interaction

Product images:

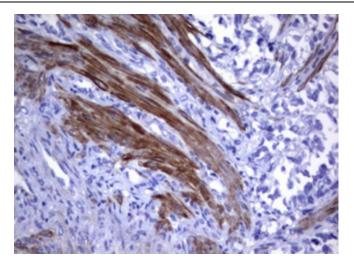

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY TNFRSF8 ([RC219819], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-TNFRSF8. Positive lysates [LY420050] (100ug) and [LC420050] (20ug) can be purchased separately from OriGene.

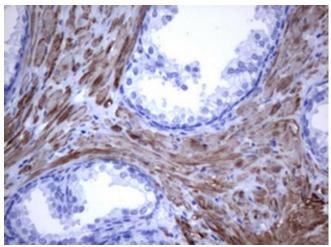

Immunohistochemical staining of paraffinembedded Human endometrium tissue using anti-TNFRSF8 mouse monoclonal antibody. ([TA801686])

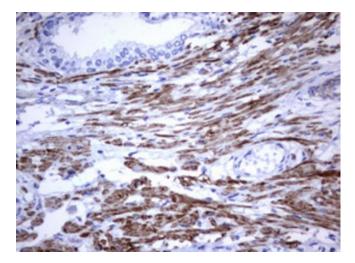

Immunohistochemical staining of paraffinembedded Adenocarcinoma of Human endometrium tissue using anti-TNFRSF8 mouse monoclonal antibody. ([TA801686])

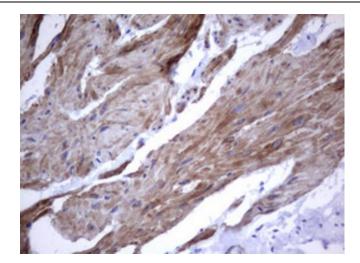

Immunohistochemical staining of paraffinembedded Human prostate tissue using anti-TNFRSF8 mouse monoclonal antibody. ([TA801686])

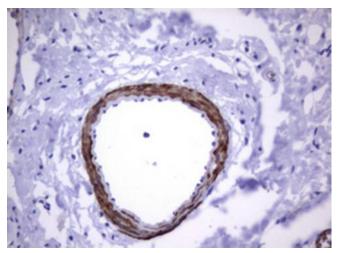

Immunohistochemical staining of paraffinembedded Carcinoma of Human prostate tissue using anti-TNFRSF8 mouse monoclonal antibody. ([TA801686])

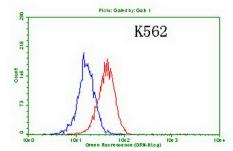

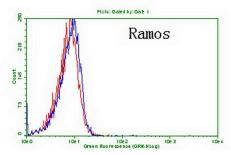

Immunohistochemical staining of paraffinembedded Human bladder tissue using anti-TNFRSF8 mouse monoclonal antibody. ([TA801686])

Immunohistochemical staining of paraffinembedded Human lymph node tissue using anti-TNFRSF8 mouse monoclonal antibody. ([TA801686])

Flow cytometric Analysis of K562 and Ramos cells, using anti-TNFRSF8 antibody ([TA801686]), (Red), compared to a nonspecific negative control antibody (TA50011), (Blue) (1:100).
