

# Product datasheet for CS503974

### **Frozen Tissue Sections, Prostate**

#### **Product data:**

| Product data.   |  |
|---|--|
| Product Type:   | Frozen Sections                          |
| Disease State:  | Normal                                   |
| Diagnosis Category:                                     | Normal                                   |
| Tissue:   | Prostate                                 |
| Frozen Sample ID:                                       | FR000081EC                               |
| Case ID:  | CI000000493                              |
| Tissue of Origin:                                       | Prostate                                 |
| Site of Finding:  | Prostate                                 |
| Appearance:   | R  |
| Sample Diagnosis (from<br>Pathology Verification):      | Within normal limits                     |
| Normal:   | 100%                                     |
| Lesional:   | 0%                                       |
| Tumor:  | 0%                                       |
| Tumor Hypo/Acellular<br>Stroma:                         | 0%                                       |
| Tumor Hypercellular<br>Stroma:                          | 0%                                       |
| Necrosis:   | 0%                                       |
| Pathology Verification<br>notes from H&E review:        | 10% epithelium, 90% fibromuscular stroma |
| CASE Diagnosis (from<br>medical center path<br>report): | Adenocarcinoma of prostate               |
| Age:  | 55                                       |
| Gender:   | Male                                     |
| Race:   | Not reported                             |
