

## Product datasheet for CS606483

## Frozen Tissue Sections, Colon

## **Product data:**

| Product Type:   | Frozen Sections                        |
|---|--|
| Disease State:  | Other Disease                          |
| Diagnosis Category:                                     | Inflammatory Bowel Disease (IBD)       |
| Tissue:   | Colon                                  |
| Frozen Sample ID:                                       | FR00003AD0                             |
| Case ID:  | CU0000001108                           |
| Tissue of Origin:                                       | Colon                                  |
| Site of Finding:  | Colon                                  |
| Appearance:   | L                                      |
| Sample Diagnosis (from<br>Pathology Verification):      | Colitis, chronic active                |
| Normal:   | 0%                                     |
| Lesional:   | 100%                                   |
| Tumor:  | 0%                                     |
| Tumor Hypo/Acellular<br>Stroma:                         | 0%                                     |
| Tumor Hypercellular<br>Stroma:                          | 0%                                     |
| Necrosis:   | 0%                                     |
| Pathology Verification<br>notes from H&E review:        | 35% mucosa, 20% submucosa, 45% muscle  |
| CASE Diagnosis (from<br>medical center path<br>report): | Colitis, chronic active                |
| Age:  | 26                                     |
| Gender:   | Female                                 |
| Storage:  | Store frozen tissue sections at -80°C. |
