

## Product datasheet for **CS612206**

### Frozen Tissue Sections, Salivary gland

#### Product data:

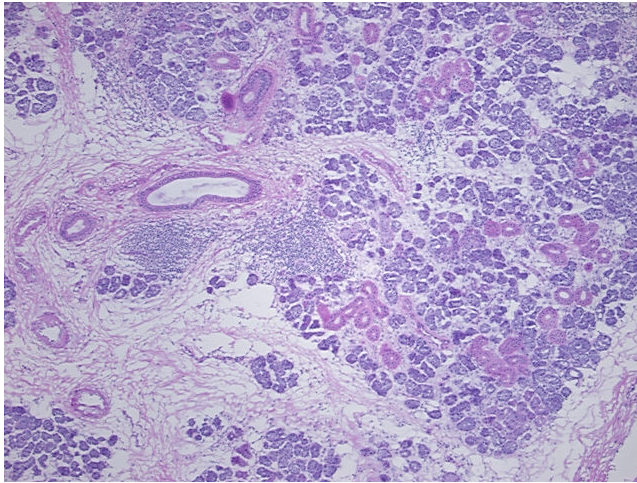

|   |  |
|---|--|
| Product Type:                                     | Frozen Sections                                      |
| Disease State:                                    | Other Disease  |
| Diagnosis Category:                               | Inflammation (various)                               |
| Tissue:   | Salivary gland                                       |
| Frozen Sample ID:                                 | FR0000719F   |
| Case ID:  | CU0000001787   |
| Tissue of Origin:                                 | Salivary gland                                       |
| Site of Finding:                                  | Salivary gland                                       |
| Appearance:                                       | L  |
| Sample Diagnosis (from Pathology Verification):   | Sialadenitis, chronic                                |
| Normal:   | 0%   |
| Lesional:   | 100%   |
| Tumor:  | 0%   |
| Tumor Hypo/Acellular Stroma:                      | 0%   |
| Tumor Hypercellular Stroma:                       | 0%   |
| Necrosis:   | 0%   |
| Pathology Verification notes from H&E review:     | 60% epithelium, 40% stroma with chronic inflammation |
| CASE Diagnosis (from medical center path report): | Sialadenitis, chronic                                |
| Age:  | 90   |
| Gender:   | Female   |
| Storage:  | Store frozen tissue sections at -80°C.               |
