

Product datasheet for **GE100032**

pLenti-Guide-Puro

Product data:

- Product Type:** CRISPR Vectors
- Function:** gRNA only vectors
- Features:**
- gRNA only vector in lenti backbone
 - gRNA expression under U6 promoter
 - 3rd generation Lenti vector, ideal for hard-to-transfect cells
 - BamH1 and BsmB I sites are used for target sequence cloning
 - Puro resistant gene allows puro selection in both transfected and transduced cells
 - Lenti particles can be produced using high efficiency [lenti packaging kits](#)
 - CF3 primer (GE100008) can be used to sequence the target sequence after cloning
 - E. Coli selection: chloramphenicol (34 ug/mL) 3rd generation Lenti vector, ideal for hard-to-transfect cells
