Product Type:	Expression Plasmids			
Product Name:	Cd63 (NM_001042580) Mouse Tagged Lenti ORF Clone			
Tag:	mGFP			
Symbol:	Cd63			
Synonyms:	C75951; ME491; Tspan30			
Mammalian Cell Selection:	Puromycin			
Vector:	pLenti-C-mGFP-P2A-Puro (PS100093)			
E. coli Selection:	Chloramphenicol (34 ug/mL)			
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(MR202922).			
<b>Restriction Sites:</b>	Sgfl-Mlul			
Cloning Scheme:				
	Cloning sites used for ORF Shuttling:			
	Sgf1         ORF         Miu I           ···         GCG ATC GCC         ATG // NNÑ         ACG CGT         ···			

				Kozak Consensus

GGA CTC AGA GTT TGC G L R V	G GTA GGA AG	3C			

\* The last codon before the Stop codon of the ORF.

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### Plasmid Map:

ACCN:	NM_001042580
ORF Size:	717 bp
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### Cd63 (NM\_001042580) Mouse Tagged Lenti ORF Clone - MR202922L4

Reconstitution Method:	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 001042580.1, NP 001036045.1</u>
RefSeq Size:	959 bp
RefSeq ORF:	717 bp
Locus ID:	12512
UniProt ID:	<u>P41731</u>
Cytogenetics:	10 77.19 cM
Gene Summary:	Functions as cell surface receptor for TIMP1 and plays a role in the activation of cellular signaling cascades. Plays a role in the activation of ITGB1 and integrin signaling, leading to the activation of AKT, FAK/PTK2 and MAP kinases. Promotes cell survival, reorganization of the actin cytoskeleton, cell adhesion, spreading and migration, via its role in the activation of AKT and FAK/PTK2. Plays a role in VEGFA signaling via its role in regulating the internalization of KDR/VEGFR2. Plays a role in intracellular vesicular transport processes, and is required for normal trafficking of the PMEL luminal domain that is essential for the development and maturation of melanocytes. Plays a role in the adhesion of leukocytes onto endothelial cells via its role in the regulation of SELP trafficking. May play a role in mast cell degranulation in response to Ms4a2/FceRI stimulation, but not in mast cell degranulation in response to other stimuli.[UniProtKB/Swiss-Prot Function]
