Methylmalonyl Coenzyme A mutase (MUT) (NM_000255) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Methylmalonyl Coenzyme A mutase (MUT) (NM_000255) Human Tagged Lenti ORF Clone

Tag: mGFP

Symbol: Methylmalonyl Coenzyme A mutase

Synonyms: MCM; MUT

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC201972).

Sgfl-Mlul

Sequence:

Restriction Sites: Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF

ACCN: NM_000255

ORF Size: 2250 bp

Methylmalonyl Coenzyme A mutase (MUT) (NM_000255) Human Tagged Lenti ORF Clone – RC201972L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 000255.1</u>

 RefSeq Size:
 3886 bp

 RefSeq ORF:
 2253 bp

 Locus ID:
 4594

 UniProt ID:
 P22033

 Cytogenetics:
 6p12.3

Domains: MM CoA mutase, B12-binding

Protein Families: Druggable Genome

Protein Pathways: Metabolic pathways, Propanoate metabolism, Valine, leucine and isoleucine degradation

MW: 83.2 kDa

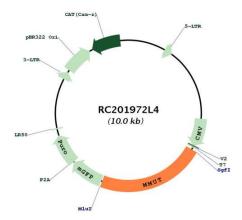

Gene Summary: This gene encodes the mitochondrial enzyme methylmalonyl Coenzyme A mutase. In

humans, the product of this gene is a vitamin B12-dependent enzyme which catalyzes the isomerization of methylmalonyl-CoA to succinyl-CoA, while in other species this enzyme may have different functions. Mutations in this gene may lead to various types of methylmalonic

aciduria. [provided by RefSeq, Jul 2008]
