## Product datasheet for RC204369L1V

## BAX (NM\_138761) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

| Product Type:                | Lentiviral Particles  |
|------------------------------|---|
| Product Name:                | BAX (NM_138761) Human Tagged ORF Clone Lentiviral Particle  |
| Symbol:                      | BAX   |
| Synonyms:                    | BCL2L4  |
| Mammalian Cell<br>Selection: | None  |
| Vector:                      | pLenti-C-Myc-DDK (PS100064)   |
| Tag:                         | Myc-DDK   |
| ACCN:                        | NM_138761   |
| ORF Size:                    | 576 bp  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC204369).  |
| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| RefSeq:                      | <u>NM 138761.2</u>  |
| RefSeq Size:                 | 888 bp  |
| RefSeq ORF:                  | 579 bp  |
| Locus ID:                    | 581   |
| UniProt ID:                  | <u>Q07812</u>   |
| Cytogenetics:                | 19q13.33  |
| Protein Families:            | Druggable Genome, Transmembrane   |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| <b>ORIGENE</b> BAX (NM_138761) Human Tagged ORF Clone Lentiviral Particle – RC204369L1V |   |
|---|---|
| Protein Pathway   | : Amyotrophic lateral sclerosis (ALS), Apoptosis, Colorectal cancer, Huntington's disease,<br>Neurotrophin signaling pathway, p53 signaling pathway, Pathways in cancer, Prion diseases   |
| MW:   | 21 kDa  |
| Gene Summary:   | The protein encoded by this gene belongs to the BCL2 protein family. BCL2 family members<br>form hetero- or homodimers and act as anti- or pro-apoptotic regulators that are involved in<br>a wide variety of cellular activities. This protein forms a heterodimer with BCL2, and functions<br>as an apoptotic activator. The association and the ratio of BAX to BCL2 also determines<br>survival or death of a cell following an apoptotic stimulus. This protein is reported to interact<br>with, and increase the opening of, the mitochondrial voltage-dependent anion channel<br>(VDAC), which leads to the loss in membrane potential and the release of cytochrome c. The<br>expression of this gene is regulated by the tumor suppressor P53 and has been shown to be<br>involved in P53-mediated apoptosis. Multiple alternatively spliced transcript variants, which<br>encode different isoforms, have been reported for this gene. [provided by RefSeq, Dec 2019] |
