

Product datasheet for RC212273L2

JNK2 (MAPK9) (NM_139070) Human Tagged Lenti ORF Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	JNK2 (MAPK9) (NM_139070) Human Tagged Lenti ORF Clone
Tag:	mGFP
Symbol:	JNK2
Synonyms:	JNK-55; JNK2; JNK2A; JNK2ALPHA; JNK2B; JNK2BETA; p54a; p54aSAPK; PRKM9; SAPK; SAPK1a
Mammalian Cell Selection:	None
Vector:	pLenti-C-mGFP (PS100071)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC212273).
Restriction Sites:	Sgfl-Mlul
Cloning Scheme:	Cloning sites used for ORF Shuttling: Sgf1 ORF Mlu I GCG ATC GC ATG// NNN

ACCN: ORF Size: NM_139070 1272 bp

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More infoOTI Annotation:This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.Components:The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10u go f transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).Reconstitution Method:1. Centrifuge at 5,000 xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.S. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.Refseq1942 bpRefseq ORF:1275 bpLocus ID:5601UniProt ID:P45984Cytogenetics:5q35.3Domains:pkinaseProtein Families:Drugable Genome, ES Cell Differentiation/IPS, Protein KinaseProtein Pathways:Adipocytokine signaling pathway, Colercetal cancer, Rising pathway, Focal adhesion, GnRH signaling pathway, NOD-like receptor signaling pathway, MAPK signaling pathway, Neurotrophin signaling pathway, NOL-like receptor signaling pathway, Toel i dabetes mellitux, Wrt signaling pathway, NOL-like receptor signaling pathway, Tpe II diabetes mellitux, Wrt signaling	GRIGENE JNK2 (MAPK9) (NM_139070) Human Tagged Lenti ORF Clone – RC212273L2

Sourigene JNK2 (MAPK9) (NM_139070) Human Tagged Lenti ORF Clone – RC212273L2

Gene Summary:

The protein encoded by this gene is a member of the MAP kinase family. MAP kinases act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. This kinase targets specific transcription factors, and thus mediates immediateearly gene expression in response to various cell stimuli. It is most closely related to MAPK8, both of which are involved in UV radiation induced apoptosis, thought to be related to the cytochrome c-mediated cell death pathway. This gene and MAPK8 are also known as c-Jun Nterminal kinases. This kinase blocks the ubiquitination of tumor suppressor p53, and thus it increases the stability of p53 in nonstressed cells. Studies of this gene's mouse counterpart suggest a key role in T-cell differentiation. Several alternatively spliced transcript variants encoding distinct isoforms have been reported. [provided by RefSeq, Sep 2008]
