### Product datasheet for RC221478L1

#### Junctional Adhesion Molecule 1 (F11R) (NM\_016946) Human Tagged Lenti ORF Clone

#### **Product data:**

Product Type:	Expression Plasmids
Product Name:	Junctional Adhesion Molecule 1 (F11R) (NM_016946) Human Tagged Lenti ORF Clone
Tag:	Myc-DDK
Symbol:	Junctional Adhesion Molecule 1
Synonyms:	CD321; JAM; JAM1; JAMA; JCAM; KAT; PAM-1
Mammalian Cell Selection:	None
Vector:	pLenti-C-Myc-DDK (PS100064)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC221478).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf1         ORF         Mlu I            GCG ATC GC/c         ATG//         NNN

ACCN: ORF Size: NM\_016946 897 bp

	unctional Adhesion Molecule 1 (F11R) (NM_016946) Human Tagged Lenti ORF Clone – RC221478L1
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Me	<ul> <li>ethod: 1. Centrifuge at 5,000xg for 5min.</li> <li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>3. Close the tube and incubate for 10 minutes at room temperature.</li> <li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ul>
RefSeq:	<u>NM 016946.3</u>
RefSeq Size:	3660 bp
RefSeq ORF:	900 bp
Locus ID:	50848
UniProt ID:	<u>Q9Y624</u>
Cytogenetics:	1q23.3
Domains:	ig, IGv, IGc2, IG
Protein Families:	Druggable Genome, Transmembrane
Protein Pathways	Cell adhesion molecules (CAMs), Epithelial cell signaling in Helicobacter pylori infection, Leukocyte transendothelial migration, Tight junction
MW:	32.58 kDa

## **DRIGENE** Junctional Adhesion Molecule 1 (F11R) (NM\_016946) Human Tagged Lenti ORF Clone – RC221478L1

# Gene Summary:Tight junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell<br/>sheets, forming continuous seals around cells and serving as a physical barrier to prevent<br/>solutes and water from passing freely through the paracellular space. The protein encoded by<br/>this immunoglobulin superfamily gene member is an important regulator of tight junction<br/>assembly in epithelia. In addition, the encoded protein can act as (1) a receptor for reovirus,<br/>(2) a ligand for the integrin LFA1, involved in leukocyte transmigration, and (3) a platelet<br/>receptor. Multiple 5' alternatively spliced variants, encoding the same protein, have been<br/>identified but their biological validity has not been established. [provided by RefSeq, Jul 2008]
