Alkaline Phosphatase (ALPI) (NM_001631) Human Tagged ORF Clone Lentiviral Particle – RC224178L1V	
MW:	56.81 kDa
Gene Summary:	There are at least four distinct but related alkaline phosphatases: intestinal, placental, placental-like, and liver/bone/kidney (tissue non-specific). The intestinal alkaline phosphatase gene encodes a digestive brush-border enzyme. This enzyme is a component of the gut mucosal defense system and is thought to function in the detoxification of lipopolysaccharide, and in the prevention of bacterial translocation in the gut.
