

Product datasheet for **SM3032B**

LFA3 (CD58) Mouse Monoclonal Antibody [Clone ID: MEM-63]

Product data:

Product Type:	Primary Antibodies
Clone Name:	MEM-63
Applications:	FC
Recommended Dilution:	Flow Cytometry: 1:200 as starting point.
Reactivity:	Human, Porcine
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	NALM-6 human pre-B cell line
Specificity:	This antibody reacts with CD58 (LFA-3), a 40-70 kDa glycoprotein distributed over many tissues, leukocytes, erythrocytes, endothelial cells, epithelial cells and fibroblasts.
Formulation:	Phosphate buffered saline (PBS) Label: Biotin State: Liquid purified Ig fraction Preservative: 15 mM sodium azide, approx. pH 8.0 Label: Conjugated with Biotin-LC-NHS under optimum conditions. The reagent is free of unconjugated biotin.
Concentration:	lot specific
Conjugation:	Biotin
Storage:	Store undiluted at 2-8°C. DO NOT FREEZE!
Stability:	Shelf life: one year from despatch.
Gene Name:	CD58 molecule
Database Link:	Entrez Gene 965 Human P19256

Background:

CD58 (LFA-3) is an immunoglobulin family adhesion molecule expressed by both hematopoietic and non-hematopoietic cells (often on antigen presenting cells) and serving as ligand of CD2. This interaction is important for T cell-mediated immunity. CD58 is expressed in transmembrane form and in GPI-anchored form; the later is constitutively associated with protein kinases whereas the transmembrane form activates kinase activity upon triggering. CD58 is a powerful tool for detection of minimal residual disease in acute lymphocytic leukemia, and for evaluation of liver damage related with hepatitis B.

Synonyms:

Ag3, LFA-3
