| Flouuet data.       |   |
|---------------------|---|
| Product Type:       | siRNA Oligo Duplexes  |
| Purity:             | HPLC purified   |
| Quality Control:    | Tested by ESI-MS  |
| Sequences:          | Available with shipment   |
| Stability:          | One year from date of shipment when stored at -20°C.  |
| # of transfections: | Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).  |
| Note:               | Single siRNA duplex (10nmol) can be ordered.  |
| RefSeq:             | <u>NM 007648</u>  |
| UniProt ID:         | <u>P22646</u>   |
| Synonyms:           | Al504783; CD3; CD3epsilon; T3e  |
| Components:         | Cd3e (Mouse) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 12501)<br>Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol<br>Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml  |
| Summary:            | Part of the TCR-CD3 complex present on T-lymphocyte cell surface that plays an essential role<br>in adaptive immune response. When antigen presenting cells (APCs) activate T-cell receptor<br>(TCR), TCR-mediated signals are transmitted across the cell membrane by the CD3 chains<br>CD3D, CD3E, CD3G and CD3Z. All CD3 chains contain immunoreceptor tyrosine-based<br>activation motifs (ITAMs) in their cytoplasmic domain. Upon TCR engagement, these motifs<br>become phosphorylated by Src family protein tyrosine kinases LCK and FYN, resulting in the<br>activation of downstream signaling pathways. In addition of this role of signal transduction in<br>T-cell activation, CD3E plays an essential role in correct T-cell development<br>(PubMed:19956738, PubMed:24899501). Participates also in internalization and cell surface<br>down-regulation of TCR-CD3 complexes via endocytosis sequences present in CD3E cytosolic<br>region.[UniProtKB/Swiss-Prot Function] |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2021 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

# Cd3e Mouse siRNA Oligo Duplex (Locus ID 12501) - SR404710Performance<br/>Guaranteed:OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will<br/>provide at least 70% or more knockdown of the target mRNA when used at 10 nM<br/>concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control<br/>duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT<br/>positive control (cat# SR30003) provides 90% knockdown efficiency.For non-conforming siRNA, requests for replacement product must be made within ninety<br/>(90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with<br/>newly designed duplexes, please contact Technical Services at techsupport@origene.com.<br/>Please provide your data indicating the transfection efficiency and measurement of gene<br/>expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data<br/>required).
