	Perilipin-1 (PLIN1) Goat Polyclonal Antibody – TA303218
Background:	The protein encoded by this gene coats lipid storage droplets in adipocytes, thereby protecting them until they can be broken down by hormone-sensitive lipase. The encoded protein is the major cAMP-dependent protein kinase substrate in adipocytes and, when unphosphorylated, may play a role in the inhibition of lipolysis. Alternatively spliced transcript variants varying in the 5' UTR, but encoding the same protein, have been found for this gene. [provided by RefSeq]
Synonyms:	FPLD4; PERI; PLIN
Protein Families:	Druggable Genome
Protein Pathways	s: PPAR signaling pathway
