P10415

Background: Swiss-Prot Acc.P10415.This gene encodes an integral outer mitochondrial membrane protein

that blocks the apoptotic death of some cells such as lymphocytes. Constitutive expression of BCL2, such as in the case of translocation of BCL2 to Ig heavy chain locus, is thought to be the cause of follicular lymphoma. Two transcript variants, produced by alternate splicing, differ in

their C-terminal ends.

Synonyms: Bcl-2; OTTHUMP00000163680
