

Product datasheet for **TA386090**

B7-1 (CD80) Rabbit Monoclonal Antibody [Clone ID: IDEC-114 (Galiximab)]

Product data:

Product Type:	Primary Antibodies
Clone Name:	IDEC-114 (Galiximab)
Applications:	BI, ELISA, FC, IHC, IP, WB
Reactivity:	Human
Host:	Rabbit
Clonality:	Monoclonal
Immunogen:	Galiximab was prepared by immunizing cynomolgus monkeys with recombinant CD80 antigen. The variable regions of the light and heavy chains were then cloned by being incorporated into a cassette vector (N5LG1) containing human constant region genes and subsequently transfected into the Dg44 CHO cell line (Hariharan K, 2013)
Specificity:	<p>Galiximab is a primatized mAb which consists of human constant and primate (cynomolgus macaque) variable regions and binds specifically to CD80. CD80 is a surface glycoprotein and a member of the B7 family of costimulatory molecules. CD80 antigen regulates T cell activation (through interacting with CD28 or CD152) and is expressed transiently in antigen-presenting cells, T cells and normal B cells, and expressed constitutively on various subtypes of B-cell lymphomas.</p> <p>Galiximab acts to decrease in cell proliferation, inhibition of the constitutively active NF-κB pathway, increase in apoptosis and ADCC against various B-cell lymphoma cell lines. Galiximab affects CD28 and CD152 interactions with CD80. This antibody can also be used for FC, WB, ELISA, IP and IHC.</p>
Formulation:	PBS with 0.02% Proclin 300.
Concentration:	lot specific
Conjugation:	Unconjugated
Storage:	Please store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C. Avoid freeze and thaw cycles.
Stability:	3 years from dispatch.
Gene Name:	CD80 molecule
