# TRPM4 Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI14F1]

#### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: OTI14F1
Applications: IHC, WB

Recommended Dilution: WB 1:1000, IHC 1:50

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full-length protein expressed in 293T cell transfected with human TRPM4 expression vector

**Formulation:** PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

**Concentration:** 0.5 mg/ml

**Purification:** Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

**Conjugation:** Biotin

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

Predicted Protein Size: 134.3 kDa

**Gene Name:** transient receptor potential cation channel subfamily M member 4

Database Link: NP 060106

Entrez Gene 54795 Human

Q8TD43

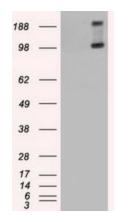

Background:

Calcium-activated non selective (CAN) cation channel that mediates membrane depolarization. While it is activated by increase in intracellular Ca(2+), it is impermeable to it. Mediates transport of monovalent cations (Na(+) > K(+) > Cs(+) > Li(+)), leading to depolarize the membrane. It thereby plays a central role in cadiomyocytes, neurons from entorhinal cortex, dorsal root and vomeronasal neurons, endocrine pancreas cells, kidney epithelial cells, cochlea hair cells etc. Participates in T-cell activation by modulating Ca(2+) oscillations after T lymphocyte activation, which is required for NFAT-dependent IL2 production. Involved in myogenic constriction of cerebral arteries. Controls insulin secretion in pancreatic betacells. May also be involved in pacemaking or could cause irregular electrical activity under conditions of Ca(2+) overload

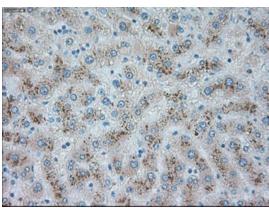

Synonyms: hTRPM4; LTrpC4; PFHB1B; TRPM4B

**Protein Families:** Druggable Genome, Ion Channels: Transient receptor potential, Transmembrane

### **Product images:**

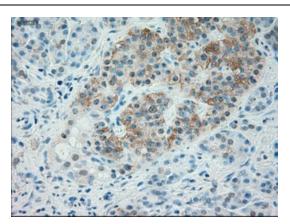

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY TRPM4 ([RC216888], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-TRPM4. Positive lysates [LY413636] (100ug) and [LC413636] (20ug) can be purchased separately from OriGene.

Immunohistochemical staining of paraffinembedded liver tissue within the normal limits using anti-TRPM4mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA500377], Dilution 1:50)

Immunohistochemical staining of paraffinembedded pancreas tissue within the normal limits using anti-TRPM4mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA500377], Dilution 1:50)
