# Product datasheet for TA806239S

# Lipin 1 (LPIN1) Mouse Monoclonal Antibody [Clone ID: OTI2C8]

## **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI2C8
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 1-274 of human LPIN1(NP_663731) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	98.5 kDa
Gene Name:	lipin 1
Database Link:	<u>NP_663731</u> <u>Entrez Gene 14245 MouseEntrez Gene 313977 RatEntrez Gene 23175 Human</u> <u>Q14693</u>

### Sourigene Lipin 1 (LPIN1) Mouse Monoclonal Antibody [Clone ID: OTI2C8] – TA806239S

Background: This gene encodes a magnesium-ion-dependent phosphatidic acid phosphohydrolase enzyme that catalyzes the penultimate step in triglyceride synthesis including the dephosphorylation of phosphatidic acid to yield diacylglycerol. Expression of this gene is required for adipocyte differentiation and it also functions as a nuclear transcriptional coactivator with some peroxisome proliferator-activated receptors to modulate expression of other genes involved in lipid metabolism. Mutations in this gene are associated with metabolic syndrome, type 2 diabetes, and autosomal recessive acute recurrent myoglobinuria (ARARM). This gene is also a candidate for several human lipodystrophy syndromes. Alternative splicing results in multiple transcript variants encoding distinct isoforms. Additional splice variants have been described but their full-length structures have not been determined. [provided by RefSeq, May 2012]

#### Synonyms:

PAP1

### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY LPIN1 ([RC207138], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-LPIN1 (1:2000). Positive lysates [LY407897] (100ug) and [LC407897] (20ug) can be purchased separately from OriGene.
