# Product datasheet for TA809315BM

# Cathepsin L (CTSL) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI2F1]

### **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI2F1
Applications:	IHC, WB
Recommended Dilution:	WB 1:2000, IHC 1:2000
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human CTSL (NP_001903) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol.
Concentration:	0.5 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	HRP
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	35.8 kDa
Gene Name:	cathepsin L
Database Link:	<u>NP_001903</u> <u>Entrez Gene 1514 Human</u> <u>P07711</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Cathepsin L (CTSL) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI2F1] – TA809315BM
Dackground	The protein encoded by this gape is a hypercomal systems proteinase that plays a major i

Background:The protein encoded by this gene is a lysosomal cysteine proteinase that plays a major role in<br/>intracellular protein catabolism. Its substrates include collagen and elastin, as well as alpha-1<br/>protease inhibitor, a major controlling element of neutrophil elastase activity. The encoded<br/>protein has been implicated in several pathologic processes, including myofibril necrosis in<br/>myopathies and in myocardial ischemia, and in the renal tubular response to proteinuria.<br/>This protein, which is a member of the peptidase C1 family, is a dimer composed of disulfide-<br/>linked heavy and light chains, both produced from a single protein precursor. Multiple<br/>alternatively spliced transcript variants have been found for this gene. [provided by RefSeq,<br/>Apr 2012]

Synonyms:	CATL; CTSL1; MEP
Protein Families:	Druggable Genome, Protease
Protein Pathways:	Antigen processing and presentation, Lysosome

## **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CTSL ([RC203143], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CTSL (1:2000). Positive lysates [LY400711] (100ug) and [LC400711] (20ug) can be purchased separately from OriGene.
