#### S1pr1 Mouse shRNA Lentiviral Particle (Locus ID 13609)

#### **Product data:**

**Product Type:** shRNA Lentiviral Particles

**Product Name:** S1pr1 Mouse shRNA Lentiviral Particle (Locus ID 13609)

**Locus ID:** 13609

**Synonyms:** Al849002; Edg1; Lpb1; S; S1; S1p; S1p1

**Vector:** pGFP-C-shLenti (TR30023)

Format: Lentiviral particles

**Components:** S1pr1 - Mouse shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble

control), 0.5 ml each, >10^7 TU/ml.

RefSeq: <u>BC049094</u>, <u>BC051023</u>, <u>NM 007901</u>, <u>NM 007901.1</u>, <u>NM 007901.2</u>, <u>NM 007901.3</u>, <u>NM 007901.4</u>,

NM 007901.5

UniProt ID: 008530

Summary: This gene encodes a G-protein-coupled receptor bound by the lysophospholipid, sphingosine

1-phosphate. The gene product functions in endothelial cells and is involved in vascular and heart development. This receptor is highly expressed in T and B lymphocytes, and it plays a role in T cell and B cell export from peripheral lymphoid organs. This protein is bound and downregulated by FTY720, an exogenous immunosuppressant drug studied in mouse

disease models for multiple sclerosis in humans. [provided by RefSeq, Jan 2010]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

# Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
