Product datasheet for TP720393

Junctional Adhesion Molecule 1 (F11R) (NM_016946) Human Recombinant Protein

Product data:

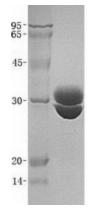

Product Type:	Recombinant Proteins
Description:	Recombinant protein of human F11 receptor (F11R)
Species:	Human
Expression Host:	HEK293
Expression cDNA Clone or AA Sequence:	Ser28-Val238
Tag:	C-His
Predicted MW:	23.9 kDa
Concentration:	lot specific
Purity:	>95% as determined by SDS-PAGE and Coomassie blue staining
Buffer:	Provided lyophilized from a 0.2 μ m filtered solution of 20 mM Tris-HCl, 150 mM NaCl
Endotoxin:	< 0.1 EU per μ g protein as determined by LAL test
Reconstitution Method:	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.
Storage:	Store at -80°C.
Stability:	Stable for at least 6 months from date of receipt under proper storage and handling conditions.
Stability: RefSeq:	Stable for at least 6 months from date of receipt under proper storage and handling
	Stable for at least 6 months from date of receipt under proper storage and handling conditions.
RefSeq:	Stable for at least 6 months from date of receipt under proper storage and handling conditions. <u>NP_058642</u>
RefSeq: Locus ID:	Stable for at least 6 months from date of receipt under proper storage and handling conditions. <u>NP 058642</u> 50848
RefSeq: Locus ID: UniProt ID:	Stable for at least 6 months from date of receipt under proper storage and handling conditions. <u>NP_058642</u> 50848 <u>Q9Y624, Q6FIB4</u>

	unctional Adhesion Molecule 1 (F11R) (NM_016946) Human Recombinant Protein – TP720393
Summary:	Tight junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell sheets, forming continuous seals around cells and serving as a physical barrier to prevent solutes and water from passing freely through the paracellular space. The protein encoded by this immunoglobulin superfamily gene member is an important regulator of tight junction assembly in epithelia. In addition, the encoded protein can act as (1) a receptor for reovirus, (2) a ligand for the integrin LFA1, involved in leukocyte transmigration, and (3) a platelet receptor. Multiple 5' alternatively spliced variants, encoding the same protein, have been identified but their biological validity has not been established. [provided by RefSeq, Jul 2008]
Protein Families:	Druggable Genome, Transmembrane
Protein Pathways:	Cell adhesion molecules (CAMs), Epithelial cell signaling in Helicobacter pylori infection, Leukocyte transendothelial migration, Tight junction
